Another "before" shot.

"After" shot of interior renovation.

"Before" picture of the warehouse at 5121 Winnetka.

The building was falling down, full of lead contamination and not to mention, unattractive...a blight on the city and the surrounding neighborhood.

Now the City of New Hope is celebrating the rebirth of a warehouse with an Open House on November 3rd.

It's located at 5121 Winnetka and for years, it was used as a ceramics manufacturing center that produced "significant" lead contamination, according to developers.

A Livable Communities grant of \$443,150 helped fund the cleanup and renovation, accomplished through a partnership with the City and Hillcrest Development Company.

Developers say today the warehouse has four new tenants and has brought more than a dozen jobs to the community.

The Open House and celebration will be held at 2:00 p.m.
